Sanfix Tile Fix 1010

Sanfix Tile Fix 1010 is a polymer-modified, cement-based tile adhesive manufactured from Portland cement and graded sand.

When mixed with water, it develops a smooth and workable consistency designed for fixing small- to medium-sized ceramic and vitrified tiles on interior floor and wall surfaces.

Excellent Adhesion

Easily Pigmented

UV Resistant

Key Advantages

- Suitable for ceramic and vitrified tiles
- Smooth and creamy texture
- Suitable for floor and wall applications
- Tile-on-tile application on floors
- Ideal for standard tile installation
- Complies with IS 15477 Type 2 Adhesive [C2]

Suitable Surfaces

- Cement Mortar Beds
- Cement Plaster
- Brick Masonry
- Cement Terrazzo

Coverage	Colour	Package Size
3 mm Bed 5 to 60 SQFT	Grey	20 KG

sanfix

Sanfix Slab Fix 2020 is a smooth, creamy, polymer-modified thin-set adhesive designed for high-performance installation of vitrified and graded tiles.

Its formulation is suitable for interior wall applications and demanding tile installations.

Strong &
Durable

Anti
Bacterial

Temperature
Resistant

Key Advantages

- Thixotropic formulation
- Suitable for fixing tiles on walls
- Tile-on-tile wall application
- Suitable for large vitrified and graded tiles
- Complies with IS 15477 Type 2 Adhesive [C2 TE]

Suitable Surfaces

- Cement Mortar Beds
- Existing Tiles/Stones
